PROFESSIONAL SUMMARY

Junior Architect and Site Architect with experience in architectural design, construction documentation, site supervision, multidisciplinary coordination, QA/QC inspections, shop drawing review, IFC drawing interpretation, RFIs, MIRs, MRFs, material submittals, quantity take-offs, and construction progress monitoring. Experienced in residential, commercial, government, and OBO construction projects.

PROFESSIONAL EXPERIENCE

Site Architect – OBO (U.S. Embassy) Construction Project | RA International General Trading L.L.C | Maldives | 10/2025 – Present

- Manage architectural site activities in accordance with IFC drawings, shop drawings, project specifications, and OBO quality standards.
- Coordinate with architectural, structural, MEP, and specialty subcontractors to identify and resolve site issues.
- Review technical submittals, RFIs, MIRs, and MRFs and coordinate required technical information for construction activities.
- Conduct QA/QC inspections, site measurements, and quantity take-offs while monitoring construction progress, quality, and schedule.
- Interpret IFC and shop drawings and coordinate architectural requirements with multidisciplinary site teams.

Senior Architect | Oxico Homes LLP | Thiruvananthapuram, Kerala, India | 06/2023 – 09/2025

- Led architectural design and execution for residential and commercial projects in accordance with client requirements and industry standards.
- Prepared design concepts, construction drawings, layouts, and technical documentation using industry-standard software.
- Coordinated with engineers, contractors, and consultants to support efficient project execution.
- Managed project delivery from concept to completion while monitoring schedule, budget, quality, and design requirements.
- Conducted site inspections to verify construction quality, design compliance, and execution accuracy.

Junior Architect | The Graphite Divine Homes | Thiruvananthapuram, India | 09/2016 – 10/2022

- Assisted with design development for residential and commercial architectural projects.
- Prepared 2D architectural drawings, construction documents, detailed layouts, and CAD documentation using AutoCAD.
- Created 3D models and visual presentations using SketchUp.
- Conducted site inspections, measurements, and progress monitoring to verify design compliance.
- Coordinated with architects, engineers, consultants, and contractors throughout project execution.
- Reviewed architectural drawings for accuracy, quality, and compliance with applicable building codes.

Site Engineer – Central Government Projects | Thirupathi Construction | Tamil Nadu, India | 08/2015 – 07/2016

- Supervised government construction projects through site inspections, drawing review, contractor coordination, quality and safety monitoring, quantity verification, progress reporting, and resource management.
- Monitored construction activities for compliance with project specifications and applicable standards.
